

Summerville, SC ~ Greer, SC ~ Myrtle Beach, SC

To whom it may concern:

We have recently been approached by one of the homeowners in your neighborhood about purchasing one of our sheds. We inform all of our customers that each home owner's association is different, and they have different requirements. We offer an array of products that can meet practically any covenant or restriction. We are furnishing this letter to let you know that our sheds are completely engineered structures, built in a factory, delivered, and set up at the customer's home. Our sheds are built to the highest standards. We build to Florida wind codes of 160 mph. Complete engineered drawings are available for permitting.

We will build any size shed you like. The roof has an optional 3" eave around the entire shed, as pictured below. We will use architectural shingles or a color steel roof to match the home. We will use LP Smart-side or LP Smart-Lap siding (50 year warranty), and then custom paint to match the home. You will find these to be very attractive sheds which will complement the property, as well as meet the requirements for your neighborhood. When we deliver the shed, we use specialized equipment to minimize any potential damage to walkways, driveways, and utilities. These buildings are engineered to sit on small blocks and we can anchor them to the ground using steel high wind anchors. Our procedures meet or exceed all building requirements. If you have any questions, please feel free to contact me.

Thank you,
Keith Kirwin
